

FIRST COAST FLY FISHERS

May 2019

Educating, Restoring, Conserving through Fly Fishing

**May 6, 2019
FCFF Meeting
7 PM at Black Creek Outfitters**

Fly Fishing the Golden Isles of GA

Featuring

Capt Dave Edens

The First Coast Fly Fishers welcomes Captain David Edens Monday, May 6th at Black Creek Outfitters. Capt. Edens will be talking about fly fishing Georgia's Golden Isles. Edens is the Coast Guard licensed captain and is an Endorsed Orvis Fly-Fishing Guide. Additionally, he is a Certified Casting Instructor and has been certified as a Professional Rod Builder by the Rod Builders Guild.

David has been an avid fly fisherman of both coastal and inland waters for almost fifty years. He has cast his line from Alaska to the Bahamas, from Vermont to California and most of the states in between.

If you ever thought about exploring the fishing opportunities along the Georgia coastline you don't want to miss Captain Edens' presentation. The Golden Isles is a diverse fishery. In the summer, the opportunity exists to catch world class jack crevalle in the 25-35 pound range as well as tarpon and triple tail on fly or spinning tackle. In the fall, the fly casting is superb for sight fishing for redfish and trout. Bull redfish, up to 40 pounds, can be found in the passes and cuts to the Golden Isles.

A couple years ago Captain Edens was featured on the Itinerant Angler Podcast. You can checkout the episode here: <http://www.itinerantangler.com/blog/podcasts/2013/04/27/podcast-georgias-coast-with-capt-david-edens/>. To learn more about fly fishing the Golden Isles be sure to check out David's website: <http://flycastcharters.com/>

Need to tune up your cast for an upcoming fishing trip? Bring your rod and plan to show up early to the May meeting. David Lambert and Dick Michaelson will be offering free casting lessons to our members prior to the start of the meeting.

Part III: The Basics of Fly Reels

By Mike Hodge, TFO Blog

This month we continue with TFO's multi-part introduction to fly fishing by Mike Hodge. If you are new to fly fishing, stick with us over the next few months for some great insight by Mike and the TFO staff. - Editor

So you have a basic understanding of fly fishing and a fly rod from Part I and II of our how to get started in fly fishing series. Now you need a reel.

Fly-fishing reels come in all shapes, sizes and styles. No blog post can begin to summarize all of these components. For now, we'll focus on the basics for the novice fly angler.

Reels have two primary purposes. They store the backing and fly line, and they provide resistance when you hook a fish. The bigger the fish, the more important your reel is in terms of performance.

Reels, like fly rods, are designated by weights. A 5-weight reel, for instance, should be matched with a 5-weight rod. Of course, this numerical system has a little wiggle room, depending on the actual weight of the rod and reel and the angler preference as he or she attempts to balance the rod with the reel.

Chances are your first rod will be a trout or panfish setup, maybe a [TFO NXT](#) or [Bug Launcher](#). Most trout or small bass or brim will not test your drag system. You can simply strip in the line — and fish — by hand.

Since you not need a complicated drag system on your first fly reel, there's no need to break the bank. The [NXT LA I reel](#) (\$79.95-\$84.95) offers exceptional value and will get the job done in most fishing situations the beginner will encounter.

If you anticipate bigger trout, bass or even a few of the common saltwater, fly-rod targets such as redfish, snook or seatrout, you will need a higher-end reel. The BVK series (\$159.95-\$299.95) or Power series (\$399.95-\$499.95) are good options. Both feature light, durable, high-end materials and a sealed, disc drag system.

You will not need a high-quality reel in most freshwater situations. Big bass and trout are the exception, not the rule. In saltwater, you will need a good reel that can prevent corrosion and handle bigger, stronger, faster fish.

Bottom line: In freshwater, the reel is probably the least important part of your setup. In saltwater, the reel is

THE most important part of your tackle. Adjust accordingly.

TFO's large-arbor spools can help combat the feisti-est of fish. The wide-diameter spool allows the angler to retrieve more line with a single turn of the handle, im- portant when a hot fish makes a screaming run. And if you like to bomb long casts while blind-casting, the large arbor design allows you pick up line much faster than a regular spool.

Higher-end reels are sturdier and can perform at a high- er level than the less expensive models. However, all reels require maintenance. Below are a few tips on what you can do to prolong the life of your high-end reel.

Fly Reel Care and Maintenance

Anodized aluminum reels are extremely corrosion- resistant but should be rinsed with fresh water after ex- posure to saltwater to help protect them. Warm water and a toothbrush can be used to dissolve any salt buildup, which may be in the reel. Anti-corrosive prod- ucts such as spray polishes, oils, etc. are not required, but may preserve the long-term aesthetics of the reel.

Lubrication

High quality grease, such as Cal's 2 Speed, should be periodically applied to:

1. The threads on the draw bar
2. All bearings
3. The spindle where it contacts the bearings with- in the spool

Drag Surface

Carbon fiber drags do not require any lubricant, but a very thin coat of [Cal's 2 Speed Grease](#) is beneficial.

TEMPLE FORK™
OUTFITTERS

Florida Confirms Red Snapper Dates for June 11-July 12

At its February meeting in Gainesville, the Flori- da Fish and Wildlife Conservation Commission (FWC) set the popular and economically im- portant 2019 Gulf red snapper recreational season to open June 11 through July 12, with a possible fall reo- pening if quota is available.

This season will apply to those fishing from private rec- reational vessels in state and federal waters and to char- ter vessels that do not have a federal reef fish permit and are limited to fishing in state waters only.

For more information, view the presentation given at the Commission meeting found at [MyFWC.com/ Commission](#) by clicking on "Commission Meetings" and the agenda under "February 20-21."

For those interested in participating in this year's Gulf red snapper season, don't forget that anglers fishing from private vessels must get the Gulf Reef Fish Angler designation on their license. For-hire operations that do not have a federal reef fish permit and are limited to state waters only for red snapper fishing must get the State Gulf Reef Fish Charter designation on their li- cense. Learn more about these programs and how to obtain these designations at [MyFWC.com/Marine](#) by clicking on "Recreational Regulations," "Reef Fish" and "Gulf Reef Fish Survey."

The Florida Fish and Wildlife Commission has developed an on-line, interactive map for tracking the occurrence and concentration of the red tide around the State. The map is available on the can be found at the following link: <https://myfwc.com/research/redtide/statewide/>

From the FWC Web Site:

These data represent the most recent eight (8) days of sampling location points for the phytoplankton that causes red tide, *Karenia brevis*. These data are exported daily at 4:45 PM Eastern Time from the HAB Database, which provides information on the presence and absence of *Karenia brevis*.

While every practical step has been taken to provide accurate data, the need for rapid distribution precludes extensive review. Furthermore, the majority of our phytoplankton abundance data have been collected in response to blooms. Environmental data has been provided by varied partners and projects over time and has not undergone extensive review. Sampling efforts and taxa targeted have also varied with funding and projects. Please keep this in mind for data analysis. Please reference the FWC-FWRI HAB Monitoring Database as the source of this data. If you have any questions or should you wish to share this data further, please contact HABData@myfwc.com to facilitate that process.

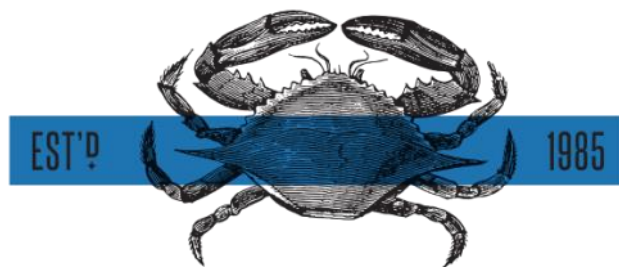

FWC Closes Harvest of Large Sea Trout in Red Tide Areas

At its February meeting in Gainesville, the Florida Fish and Wildlife Conservation Commission (FWC) announced a proactive change to conserve spotted seatrout impacted by the prolonged red tide in southwest Florida while continuing to offer quality fishing opportunities.

Currently, anglers may harvest a single spotted seatrout per day that is larger than 20 inches. Starting Friday, Feb. 22, recreational anglers will no longer be allowed to harvest any spotted seatrout over 20 inches total length when fishing in state or federal waters from the Pasco-Hernando county line south to Gordon Pass in Collier County. This rule change will remain in effect through May 10, 2019. Red drum and snook are currently catch-and-release only in this region through May 10 as well.

While these species need additional time to recover, the red tide that was impacting southwest Florida has subsided.

Send your comments about the [spotted seatrout fishery](https://www.fwc.com/saltwatercomments) by visiting [MyFWC.com/SaltwaterComments](https://www.fwc.com/saltwatercomments).

Introducing 2019 FCFF Board of Directors

A quiet transition has taken place over the last two months. Several members of the Board of Directors have stepped down to make way for new members. While other members has assumed new responsibilities.

Before we welcome in the new members we owe a hardy thank you and a debt of gratitude to the 2018, Board of Directors. Our sincere thanks go to Scott Shober, Matt Omlor, Eric Kazmerchak, Bob Connery, Paul Hutchins, John Halverson, Gavin Glover, Corri Davis, Jerry Bott and Dave Kudley for all their dedication and hard work in 2018.

This year, taking over the helm of the Club will be **Eric Kazmerchak**. A resident of Florida since the fifth grade, Eric is a retired Navy Senior Chief. His father taught him how to fly fishing when he was just a kid. Eric, his wife and daughter are all avid lovers of the outdoors. Last year Eric served the Club as Vice President of Outings. As President, Eric is looking to increase the youth involvement in the Club and provide some diversity to the programs and outings.

New Board member **Ed Glowacki** was elected to the position of Vice President of Programs. Originally from Chicago, Ed moved to Jacksonville in 1973. He credits his father for giving him his first fly rod in 1960, a Wright and McGill 8-weight fiberglass rod which he still uses today. About 20 years ago a friend from Fernandina Beach introduced Ed to sight fishing for redfish. That experience changed everything, not the least of which has been the annual budget set aside for modern fly rods, reels and fly fishing paraphernalia. According to Ed his wife doesn't acknowledge that he is a fly fisherman. She prefers to delude herself with the thought that he is spending all of the family's money on women and booze. Ed works as a naval architect and principal of a small engineering firm.

Hal Lewis joins the Board as Vice President of Outings. He grew up in Charlotte, North Carolina where he developed a love for freshwater fishing for bass and bream on the areas small lakes and ponds. Hal moved to Jacksonville where he developed a love for saltwater fishing. After years of spin-fishing the north Florida inshore waters Hal began fly-fishing in 2016 in an effort to reduce his fish harvesting and increase costs (at least

that's what his wife has noticed). Hal supports his new-found fly fishing habit by working as a professional engineer, traveling across the US and abroad working on mergers and acquisitions.

For the past few years, **Bob Connery** has been responsible for the Club's purse strings. A job he assumed from long-time Treasurer Don Edlin. Bob is a long-time member of the Club and served on the Board of Directors in various capacities. A Navy veteran, Bob is a science teacher in the St Johns County School District. When school is not in session, Bob can be found traveling with his wife. He regularly travels to the western US to fish the big rivers for trout.

Paul Hutchins has been the Club's Secretary since 2015. A native of Florida, Paul first picked up a fly rod as a teenager and learned to fly fish at the elbow of his father. For the past 13 years he has been an active member of the Club. When he is not on the water Paul is an engineer with RS&H, a local engineering firm where he has worked for the last 39 year.

The Club is all about its members. And keeping track of our members is **John Halvorsen**. John began fishing in Saskatchewan Canada with his grandfather which began his love of fishing. He started fly fishing as a teenager in Chattanooga on the Hiwassee River and tied flies in the winter. John's fishing interests include catching reds and sea trout. During the week John works for a forestry consulting firm helping landowners manage their timber.

Overseeing the Club's education programs is **Gavin Glover**. Gavin grew up on the St Johns River and joined the Club before he could drive. He as the distinc-

904-687-9498

www.drummancharters.com
drummancharters@att.net

tion of being one of the youngest Certified Casting Instructors in the county. Gavin is attending college and when he is not in class he can be found fishing the River or commercially tying flies.

Past-President **Scott Shober** picked up the Banquet Chairman mantle. He was responsible for organizing and coordinating the hugely successful FCFF Rendezvous at Deep Creek featuring Dusty Sprague. His day job has him managing databases for Safariland.

Danny Costello is the first of our two At-Large Board Members. He began fly fishing over 30 years ago. Prior to moving to St. Marys, Georgia, he spent a lot of his time fishing in Virginia. This included bass and striped fishing in the Potomac River. He served as the Youth Director of Virginia BASS for several years.

Captains for Clean Water Names New Director of Operations

Captains For Clean Water was founded out of necessity and with a singular mission: Restore the Everglades, save Florida's water.

By remaining focused on this mission and the objectives required to quickly and effectively achieve it, the organization has grown a large, active supporter base that shares their views and priorities for Everglades restoration. Captains For Clean Water began as two fishing guides, but is now hundreds of thousands of voices that are proving effective and proactively making progress toward change-based policy and solutions for Florida's water crisis.

At three-years-old, the organization has charted plans for growth, previously initiating a search for a Director of Operations to organize and oversee daily operations and to help achieve strategic goals through support of initiatives and internal operations.

Captains For Clean Water is excited to now announce the addition of their new Director of Operations, Noelle Casagrande. "I'm thrilled to come aboard and serve this crucial mission while developing the Captains team and brand for short- and long-term success," says Casagrande.

Captain Noelle Casagrande brings 15 years of experience in marketing, media relations, C-suite communications, and corporate giving. After graduating from the University of Florida with a degree in Public Relations

The award for the fly fisherman with the best last name goes to **Ron Fish**, who is our second At-Large Member. Ron grew up in Virginia, out side of Washington DC, where he started fishing as a teenager. In his youth he spent his time freshwater fishing and occasionally surf fishing. He moved to Jacksonville 25 years ago and continued to surf fishing while working as a Software Developer. Now retired, Ron has time to dedicate to other pursuits including fishing, kayaking, woodcarving and photography. He also volunteers with the Boy Scouts.

Thank you to the outgoing and incoming Board Members for the dedication and service to the Club. Take a moment and let them know how much you appreciate the work that they do for the Club. Members.

and Business, Noelle worked across a variety of organizations spanning retail, hospitality/tourism, and non-profit, accelerating their relevancy, growth, and success. Noelle has been recognized by media and prominent business groups for professional excellence, community service, mentoring, and leadership. Growing up in Southwest Florida, Noelle is an avid boater, Master Captain, and dedicated advocate for the sustainability of our marine habitats.

Casagrande will manage the overall performance and growth strategy needed to scale the organization, a key component of their future impact and sustainability. Her new role will include developing strategy, overseeing partnerships and vendors, building the culture and team, establishing policies and operating procedures, managing operating expenses and budget, optimizing retail offerings and expanding distribution.

Captain Daniel Andrews, Co-Founder and Executive Director, says, "The reach and impact of Captains grew quicker than any of us expected. We've known that if we're going to continue to be effective, we needed to build a team of strong, experienced individuals with the same dedication to fixing Florida's water. Noelle brings with her many years of experience and we're excited to have her help in shaping the organization as we grow."

Florida Closes Down Snook/Redfish/Trout Harvest in Southwest Florida

At its May meeting in Tallahassee, the Florida Fish and Wildlife Conservation Commission (FWC) extended several fisheries management conservation measures for red drum, snook and spotted seatrout in areas of southwest Florida impacted by a prolonged red tide that occurred from November 2017 through mid-February 2019.

The extension for red drum, snook and spotted seatrout will go into effect May 11 and will apply from the Pasco-Hernando county line south (including all waters of Tampa Bay) through Gordon Pass in Collier County. Previously approved catch-and-release measures, including no harvest of spotted seatrout over 20 inches, remain in effect through May 10.

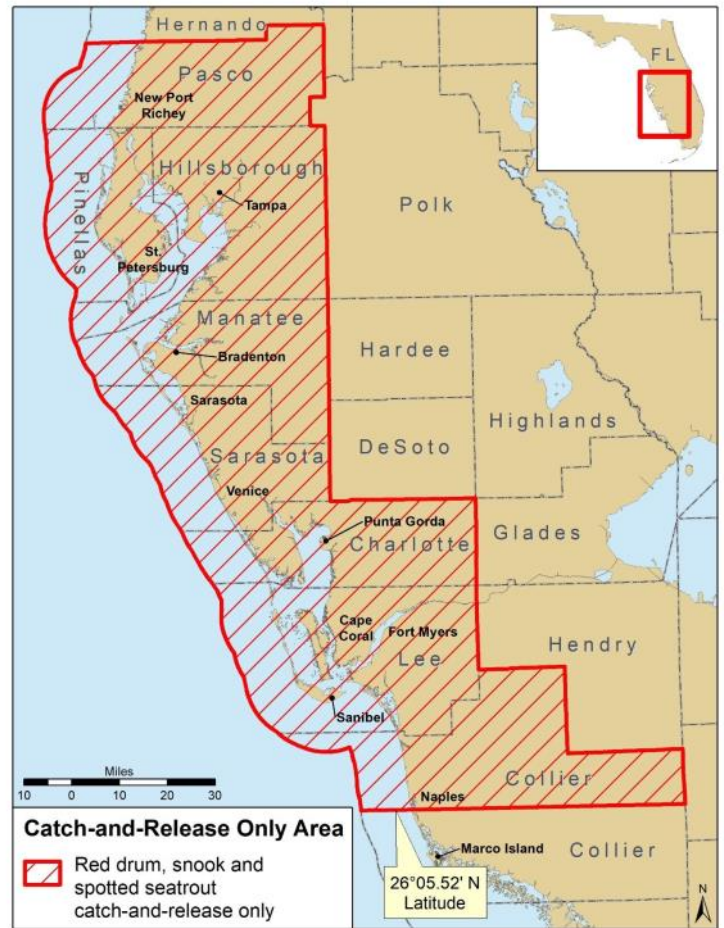

Changes effective May 11:

- Snook and red drum will remain catch-and-release only for an additional year through May 31, 2020.
- Spotted seatrout will be catch-and-release only, including no commercial harvest through May 31, 2020.

The approved changes will give these important fisheries additional time to recover from red tide. Staff will continue monthly monitoring of local red drum, snook and spotted seatrout populations throughout the coming year to help determine whether these species are rebuilding under the temporary management measures.

Staff will also revisit the snook extension in early 2020 to determine if that species may be reopened to harvest earlier than May 31, 2020.

Staff has been working with partners including Coastal Conservation Association Florida, Duke Energy and Mote Marine Laboratory & Aquarium to raise and release red drum and snook into southwest Florida waters to help address red tide impacts.

Dusty Sprague

In March the Club has the honor of hosting Master Casting Instructor Dusty Sprague for its annual Rendezvous at Deep Creek. For those of use in attendance, it was a treat to learn from one of the best and most influential casting instructors

Dusty's father taught him how to fly fish in the late 1950s. He began fly fishing in the late 1950s. He began tying flies and teaching fly casting in the 1970's; and guiding in the early 1980's. He has fly fished for fresh or saltwater species in much of the US, Belize, Mexico, the Bahamas, and Canada, and has guided in Colorado, northern New Mexico and southeast Alaska.

He is the lead instructor for Boca Grande Outfitters in southwest Florida and was the lead instructor for the former Casey Key Anglers and Outfitters and Flying Fish Outfitters in Nokomis, Florida. He has been the lead instructor for the past seven years at Ascension Bay Bonefish Club in Mexico, where he coaches anglers pursuing bonefish, permit, tarpon and snook.

He has conducted saltwater fly fishing schools and hosted groups in pursuit of shallow-water species in the Bahamas, Mexico, and Belize. He is a former manager of The Angler's Covey fly shop and The Peak Fly Shop in Colorado Springs and the former manager of the fly fishing guide service at the Broadmoor, a five-star resort hotel in Colorado Springs. He, along with Bruce Richards was selected by Cabela's corporation to develop and present the first corporate sponsored fly fishing training to selected staff from Cabela's northern tier stores. He has been a featured presenter of fly casting demonstrations at numerous fishing shows and has appeared on NBC's Today Show and ESPN's Fishing Across America.

Twenty Questions

1. Where are you originally from and how long have you lived in Florida?

Originally from a small town on the Mississippi river in southeast Missouri. Moved to Florida from Colorado in 2004.

2. What is your job/profession?

I had a 21-year career in the U.S. Air Force, retiring in 1987. I retired again in 1998 from OAO Corporation, a Colorado Springs defense contractor. I was director of Business Development and Marketing for one of their divisions.

3. Tell us a little something about your family?

I lost my dear wife to cancer in October after 50 great years together. We have one daughter, Leslie, a science teacher at a high school in Melbourne, Florida.

4. How long have you been fly fishing?

My dad was an avid fly fisher and he taught me the sport beginning when I was about 10 years old.

5. Who are your heroes or who do you admire most?

In the fly fishing world the following people have had a profound influence on me: Lefty Kreh, Mel Krieger, Steve Rajeff, Joan Wulff, Bruce Richards, Gary Borger, Doug Swisher, Al Kyte and more.....

6. Where is your favorite place to fish?

Saltwater - South Andros. Freshwater - Lake Kissimmee

7. With what person, living or dead, would you like to spend a day on the water?

Saltwater - Lefty. Freshwater - Rick Clunn

8. Aside from the obvious (rod, reel and flies) what piece of fly fishing gear do you consider essential to have with you on the water?

Eye and sun protection

9. What is your "go-to" fly?

Depends on several variables but overall...a single pattern....probably a Clouser Minnow.

10. What is your favorite fish to catch on a fly rod.

Bonefish

11. If you wrote an autobiography, what would the title be?

Fishing Of Course ! (Fortunately, in the Air Force, I was offered several choices on locations to be stationed during my 21-year career. My decisions were heavily influenced by the local fishing opportunities. We chose Colorado Springs as our retirement location because of the fishing opportunities along with opportunities in the defense industry.)

12. What is the last book you read?

Finesse Fishing with Mike Iaconelli

13. If you could put a message on a billboard for millions of people to see, what would it be?

Be nice to one another !

14. How many fly rods do you own?

I came to Florida with 31 fly rods.....I've pared down to 6 presently.

15. What is your favorite guilty pleasure?

I really like Mic Ultra.

16. What is your idea of a perfect day on the water?

Favorable weather, hungry fish, good company, and of course a cold brew at the end of the day.

17. Which talent or skill would you most like to have?

I'd like to understand the fish better.....several different species...

18. If you could travel back in time, what year would you visit and why?

I'd love to be back in the 1960s in the Keys fishing for tarpon and bonefish.

19. What is your most treasured possession?

I sold it on Ebay. In dire need of a pair of Power Poles for my Action Craft, I sold my Lawrence A. Waldron vise on Ebay for \$2950. Wish now I had not sold it. That vise was a gift from a dear friend.

20. What has been the most significant moment of your life thus far?

The loss of my dear wife. Tragic to me.

Bonus Question: What is the one thing that most people can do to improve their fly casting?

Practice correctly.

31st President of the United State

Fly Fisherman

Geologist

By all accounts the First Coast Fly Fisher's annual Rendezvous at Deep Creek was a success. Over 45 members and guests turned out to spend the day with Master Casting Instructor Dusty Sprague.

The day began with coffee, doughnuts and Dusty explaining the fundamentals of casting. It quickly became apparent why Dusty is one of the best casting instructors around. His clear concise explanations helped to demystify the cast. Afterward, Dusty demonstrated various casting techniques and provided one-on-one instruction. Assisting Dusty David Lambert and Dick Michaelson. It was the perfect opportunity for members to fine tune their casting skills before hitting the water in the spring.

Lunch was provided by The Spot Café of St. Augustine. Afterward, the Club auctioned and raffled off several thousand dollars worth of fly fishing gear, apparel and trips. This year's grand prize was a Hardy Zephrus fly rod.

We would like to thank everyone that made this years Rendezvous. Banquet Chairman Scott Shober spent numerous hours coordinating and organizing the event.

Helping him along the way were Dick Michaelson, John Halverson, Paul Hutchins, Hal Lewis, Ed Glowacki, Eric Kazmerchak, Ron Fish, Danny Costello, David Lambert and Gavin Glover. Several shops and guides donated items and trips for the raffle and silent auctions, including: Black Creek Outfitters, Black Fly Outfitters, Captains James Dumas, Lawrence Piper, David Borries, and Larry Miniard. We would also like to than Bobby Weed for allowing us to use Deep Creek Lodge for the Rendezvous. Finally, we would like to thank all the members and guests who attended the Rendezvous. **Thank you!**

Groundbreaking New Book is the First to Focus Exclusively and in a Big Way on Women Anglers.

Fifty Women Who Fish is the most complete book ever published about where, why and how women fish. This exciting new book is a sweeping portrayal of the lives and adventures of 50 exceptional female sport fishers—some famous who travel the world fishing faraway rivers and oceans, others who are everyday anglers content to explore local lakes and beaches.

Of 35.8 million anglers who fish for sport in America, 9.8 million are women, according to the U. S. Fish and Wildlife Service's most recent comprehensive national survey of outdoor recreation.

Although more than one in every four American anglers is a woman, until recently fishing for sport—especially for prized game species—was considered by many a “man’s game.”

Fifty Women Who Fish puts that myth to rest forever.

Author Steve Kantner of Fort Lauderdale, Florida spent two full years interviewing devout anglers far and wide for this book. He

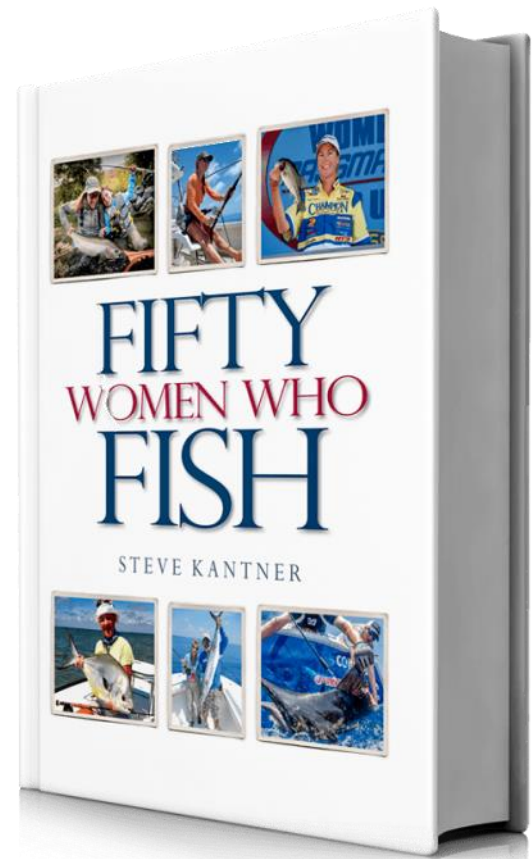

sought out a wide range of individual female anglers, age 20 to 90, from Florida to Alaska, Massachusetts to Oregon. They fish for trout, bass, tuna, bluefish, stripers, tarpon, bonefish, roosterfish, marlin, sailfish—anything and everything that swims in freshwater and salt. They fish with flies and lures and bait. All are passionate about their favorite outdoor sport. Many of their personal stories are riveting. All are interesting.

“As these diverse and vivid portraits reveal,” publisher Thomas R. Pero said, “women are not only highly accomplished on the water, they are increasingly active in efforts to protect and restore the aquatic ecosystems and wild populations of fish on which our entire sport depends.”

The large-format book is a gorgeous hardcover production of more than 300 pages with hundreds of color photos. It sells for \$59.95. The book is proudly printed in Michigan by skilled American craftsmen on paper milled in Wisconsin.

ABOUT THE AUTHOR

Steve Kantner is a former guide and outdoor expert who entered the fishing business after stepping off the canal banks in his native south Florida. Steve's cameo enterprise, Landcaptain, Inc., takes its name from how

he guided customers on foot—or from the seat of his car. A Florida fixture for more than 50 years, Kantner has walked (and fished) practically every foot of surf, pier and canal bank that's accessible to anglers on foot.

After starring in various television productions—ones that showcased his unique approach to fishing and guiding—and hosting a drive-time radio show, Steve decided to become a full-time writer. He later added fly-casting instructor, seminar promoter and, eventually, editor whose byline has appeared in *Salt Water Sportsman*, *Florida Sportsman*, *Fly Rod & Reel*, *Fly Fishing in Salt Waters* and other popular publications. He has also written for the *South Florida Sun-Sentinel*, and was once the assistant editor as well as editor-at-large and opinion columnist for *Florida Fishing Weekly*.

Fans of Andy Mill's classic *A Passion for Tarpon*, published in 2010 by Wild River Press, will recall that Kantner wrote the angling history chapter. He is also the author of *The Ultimate Guide to Fishing South Florida on Foot* (2014) and, most recently, *Backcountry Flies: From Swamp to Surf* (2019).

Steve is widely regarded as the “walk-in expert.” In sharing what he's learned with others, he adds practical knowledge to scientific perspective—thanks to a degree in science—along with a twist of Falstaffian humor. The result, he hopes, will direct his readers not only in finding fish, but also in how to catch them. And now he's embarked on that greatest of adventures: the study of accomplished women.
